J2534 OEM Software (Does Not Include Software)

J2534 OEM Diagnostic Software Compatibility

The adapter you have purchased is provided with an SAE J2534-compliant interface (an SAE standard for electronic module reprogramming). The USB-LINK should be able to reprogram all CAN/ISO15765 vehicles, GM vehicles using the J1850 Variable Pulse Width (VPW) protocol, or other vehicles using the USB-LINK J2534-supported protocols (i.e. ISO9141/KWP2000).

The USB-LINK has been validated against the following OEM and component applications:

General Motors TIS2Web

Ford Module Programming (FMP)

Chrysler J2534 Application

Toyota TIS (Technical Information System)

Honda Service Express

Mazda Module Programming (MMP)

Kia J2534 KMA

Hyundai 2534 HMA

Volkswagen Erwin

Audi Erwin

Nissan J2534 ECU Reprogramming Software (NERS)

All J2534 reprogramming and diagnostic software packages that are J2534-1 and J2534-2 compliant and use a protocol supported by the USB-LINK should work as long as the operating system is supported by the application. Note that not all OEMs have released J2534-2 compliant software.

Repair and Service Procedures

One-year warranty

The RMA number must appear clearly on the outside of the shipping box when being shipped to Dealer. We appreciate your cooperation in our continued effort to provide efficient and timely product service and support
